

FAISAL HOSSAIN

Frontend-Focused Full-Stack Software Engineer

+49 174 3700638 | faisalh.iu@gmail.com | Offenburg, Germany

fhjoy.github.io/portfolio | github.com/fhjoy | linkedin.com/in/faisal-hossain-de

Core Competencies: Frontend Architecture · JavaScript · TypeScript · React · Vue.js · Angular · Node.js · REST APIs · Micro-Frontends · Design Systems · Accessibility (WCAG) · Testing

Work Authorization: Unrestricted work authorization (Niederlassungserlaubnis)

Relocation: Open to relocating within Germany

Availability: Available immediately

PROFILE

Frontend-focused full-stack software engineer with 4+ years of professional experience building modular, accessible web applications and reusable frontend systems. Combines frontend experience in React, Vue.js, Angular and TypeScript with full-stack skills in Node.js, Express and MongoDB. Applies micro-frontend and monorepo patterns, state and data-flow design and API integration to build maintainable systems, supported by experience in performance optimization, automated testing, CI/CD, Docker and cloud deployments. Communicates clearly, collaborates effectively in cross-functional teams and takes ownership from implementation through delivery and maintenance.

PROFESSIONAL EXPERIENCE & PROJECTS

06.2026 – Present | Independent Project | RoleNaviq – Job Application Management Platform | rolenaviq.vercel.app

- Built RoleNaviq end-to-end, combining application tracking, dashboards, Kanban workflows, interview calendar, and a separately deployable interview-preparation micro-frontend; an AI document-analysis service with Python/FastAPI is planned.
- Implemented secure per-user workflows and maintainable data and form handling; improved initial-load performance with route-level lazy loading and established automated testing, containerized development, CI/CD and independent cloud deployments.

Tech: TypeScript, React, TanStack Query, Angular, Vite, Tailwind CSS, React Router, React Hook Form, Zod, Node.js, Express, MongoDB, Mongoose, JWT, Vitest, Cypress, Supertest, React Testing Library, Docker Compose, GitHub Actions, Vercel, Render, MongoDB Atlas

05.2023 – 12.2025 | Software Developer | exagon consulting & solutions GmbH | Full-time | Germany

- Developed and extended 20+ Deutsche Telekom projects and 17+ partner websites (e-commerce, customer portals, trade-in, streaming/TV, B2B), including responsive multi-device apps and micro-frontends with Module Federation; took technical ownership of several projects from development to maintenance.
- Built 30+ reusable UI components based on the Telekom Design System; resolved 300+ WCAG 2.1 AA accessibility issues.
- Refactored legacy code and migrated applications from React and Vue 2 to Vue 3, improving maintainability.
- Developed and consumed REST APIs and integrated GraphQL APIs (Apollo Client); worked in agile Scrum/Kanban teams with developers, designers and project managers; took part in code reviews.

Tech: JavaScript, TypeScript, Vue.js (Vuex/Pinia), React (Redux), Node.js, Express, REST APIs, GraphQL (Apollo Client), Module Federation, Storybook, Webflow, Docker, Jira, Confluence, GitLab, Vite

05.2022 – 04.2023 | Web Developer (Working Student) | Natif.ai | Part-time | Germany

- Extended an AI-based intelligent document processing (IDP) product with 20+ Vue.js features; developed new components and refactored existing ones.
- Coordinated the testing team for about six months, prioritized test tasks and aligned with developers; conducted root cause analyses and supported developers with hard-to-test components.
- Built automated E2E and component tests with Cypress and Jest and integrated them into GitLab CI/CD, increasing E2E coverage of critical user flows from approximately 10% to 85% and component test coverage from 0% to 70%.
- Modernized legacy code and dependencies, improved load time and fixed bugs.

Tech: HTML, CSS, JavaScript, Vue.js, Jest, Cypress, GitLab CI/CD, Git, Webpack

Earlier experience

01.2019 – 09.2019 | Web Developer | Venus IT Institute, Bangladesh | WordPress sites, customer and technical support

04.2016 – 12.2018 | IT Support | Anik Telecom Ltd., Bangladesh | Computer systems, hardware and software support

05.2013 – 03.2016 | Freelancer | Upwork, Remote | WordPress sites, SEO and technical writing for international clients

EDUCATION & TRAINING

- 03.2026 – 08.2026 | German Language Course (B2) | Institut für deutsche Sprache (IDS), Offenburg
- 10.2019 – 02.2023 | Master’s Degree in Communication and Media Engineering (CME) | Hochschule Offenburg | Grade 1.8
- Master’s thesis: Comparison of Server-Side Rendering (SSR), Single Page Application (SPA) and Static Site Generation (SSG) in modern web development. Tech: React, Material-UI, Node.js, Express, MongoDB, Next.js, REST APIs, Authentication.
 - Internship: Web Design & Development; built an e-commerce site with Figma, WordPress, WooCommerce and CSS.
 - Project: Frontend Web Development; built a social media application with Progressive Web App (PWA) features using HTML, SCSS, JavaScript and React.
 - Award: STIBET Scholarship (05.2021).
- 04.2009 – 02.2016 | Bachelor’s Degree in Computer Science & Engineering (CSE) | Islamic University, Bangladesh | CGPA 3.46/4.00 (approx. grade 1.8 in Germany)
- Award: Academic Excellence Award (04.2012, 02.2016).

SKILLS & TECHNOLOGIES

Frontend: JavaScript (ES6+), TypeScript, React (Redux, TanStack Query/React Query), Vue.js (Vuex, Pinia), Angular (NgRx), Next.js, Storybook, HTML5, CSS3, Sass/SCSS, Tailwind CSS, Bootstrap

Frontend Architecture & System Design: SPA, SSR, SSG, modular and component-driven design, micro-frontends (Module Federation), monorepo structure (Nx), state and data-flow design, code splitting and lazy loading, API and deployment boundaries

Backend, APIs & Data: Node.js, Express, REST APIs, GraphQL API integration (Apollo Client), JWT, MongoDB, Mongoose

Testing: Cypress, Jest, Vitest, React Testing Library, Supertest

Cloud & DevOps: Docker, GitHub Actions, GitLab CI/CD, Vercel, Render, Git, GitHub, Linux

Quality: Accessibility (WCAG 2.1 AA, a11y, BFGS), performance optimization, clean code, responsive design, SEO

AI & LLM: AI-assisted development (Claude Code, Codex, GitHub Copilot, Cursor); LLM API integration and RAG (learning)

CMS: WordPress, Webflow, WooCommerce

Collaboration: Jira, Confluence, Scrum, Kanban

Build & Tooling: Vite, Webpack, npm, Yarn

COURSES & CERTIFICATES

- ChatGPT & Generative AI – Udemy, 2025
- Node.js, Express, MongoDB – Udemy, 2022
- Intercultural Competence – Offenburg University of Applied Sciences, 2019
- Vue – The Complete Guide – Udemy, 2023
- Advanced React and Redux – Udemy, 2022

REFERENCE HIGHLIGHTS

- Employment Reference – exagon consulting & solutions GmbH: Confirms outstanding expertise in modern web technologies and accessibility, excellent work quality and performance that met or exceeded the company’s highest expectations. Contact: Metin Deniz, Director E-Commerce | mdeniz@exagon.de | +49 2241 25299-19
- Employment Reference – Natif.ai: Confirms very good technical knowledge, high initiative, Cypress and Jest testing responsibilities, reliability and excellent professional conduct; signed by both CEOs.
- Letter of Recommendation – Prof. Dr. Tom Rüdebusch, Hochschule Offenburg: Strong and unreserved recommendation; master’s thesis awarded grade 1.0. Contact: ruedebsch@hs-offenburg.de | +49 781 205-131
